IMPIEGO. La forma costruttiva di questi ventilatori dotati di ampio bocchaglio in aspirazione consente di superare gli odierni problemi di rumorosità negli ambienti industriali di lavoro. Vengono particolarmente usati per l'aspirazione di aria polverosa ed umida, fume di vapori e di combustione (centrali termiche, fonderie, falegnamerie, cartiere, essiccatoi, industrie chimiche, ceramiche e marmistiche). Trovano impiego nelle applicazioni per radiatori, aerotermi, torri di raffreddamento e nella ventilazione per la dispersione del calore nei trasformatori. Utilissimi durante la stagione estiva in locali in cui necessitano ricambi d'aria atti a conservare un ambiente arieggiato e salutare. Temperatura d'esercizio: - 20 °C + 40 °C.

DESCRIZIONE COSTRUTTIVA. Accoppiamento diretto. La cassa convogliatrice viene costruita in robusta lamiera di acciaio Fe 360 B con ampio bocchaglio aspirante flangia secondo norme DIN 24154. La girante, pressofusa in lega di alluminio, con pale a profilo alare orientabili da fermo, è accuratamente equilibrata dinamicamente. La verniciatura dei particolari in lamiera viene effettuata mediante immersione in bagno elettrolitico e successiva cottura in forno (+ 180 °C). Per le grandezze ≥ 1120 i ventilatori sono zincati a caldo di serie.

MOTORE. Il motore è trifase, 220/380V, 50 Hz, forma B3; (altre frequenze, tensioni, costruzioni a doppia velocità o antideflagrante verranno fornite su richiesta).

FLUSSO D'ARIA. Nella costruzione di serie è previsto il flusso d'aria dal motore alla girante (flusso "A"). Su richiesta è previsto anche il flusso opposto (flusso "B").

USE. This series is particularly suitable for the removal of air, fumes and gases (foundries, woodworks, paper mills, heating plants, chemical industries).

WORKING TEMPERATURE. - 20 °C + 40 °C.

CONSTRUCTION. Axial-flow fan, direct drive. The impeller is made of die-cast aluminium and has adjustable blades. The housing is made of welded sheet steel with inlet nozzle. For the size ≥ 1120 the fans are standard hot galvanized.

MOTOR. The motor is three-phase, 220/380 V, 50 Hz, B3; (other frequencies, tensions on demand).

DIRECTION OF THE AIR. Normally supplied with the air flowing from the motor to the impeller (A), on demand the fans can be supplied with the direction from the impeller to the motor (B).

UTILISATION. La forme constructive de ces ventilateurs permet de réduire les problèmes causés par le niveau sonore. Le pavillon d'aspiration réduit le niveau sonore et augmente en même temps le rendement. Les ventilateurs de cette série sont utilisés pour l'aspiration d'air poussiéreux et humide, vapeurs, combustions (centrales thermiques, cimenteries, fonderies, menuiseries, industrie chimique, industrie du marbre, séchage etc). Pendant les mois d'été ils sont particulièrement utiles pour l'aération des endroits, et ils permettent des conditions meilleures de travail.

TEMPÉRATURE D'EXERCISE. - 20 °C + 40 °C.

CONSTRUCTION. Accouplement direct. L'enveloppe est en tôle d'acier, avec pavillon d'aspiration et contrebride selon DIN 24154. La roue est soigneusement équilibrée dynamiquement. Elle est à haut rendement et avec un niveau sonore réduit, en aluminium, avec pales profilées, qui peuvent être orientées lorsque l'installation est arrêtée. Toutes les pièces en acier sont peintes par électrophorèse. Pour les diamètres ≥ 1120 les ventilateurs sont galvanisés à chaud en standard.

MOTEUR. Le moteur est triphasé, 220/380 Volt, 50 Hz, forme B3; (autres fréquences, tensions, double vitesse sont livrés sur demande).

FLUX DE L'AIR. Normalement nous fournissons les ventilateurs avec le flux d'air qui va du moteur à la roue (flux "A"). Sur demande l'on peut fournir le sens inverse (flux "B").

ANWENDUNG. Diese Serie eignet sich besonders zur Absaugung von Reinluft, Dämpfen und Gasen - z.B.: bei Heizungsanlagen, Gießereien, Schreinereien, Papierfabriken, chemischer Industrie, Ziegel- und Holz Trocknung, Kühlerbau, Kühltürmen sowie Transformatoren.

BETRIEBSTEMPERATUR. 253 K bis 313 K (-20°C - +40°C).

BAUFORM. Direktantrieb, Gehäuse aus Stahl mit serienmäßig tiefgezogener Einströmdüse sowie druckseitigem Flansch nach DIN 24154. Laufrad aus ex-geschütztem Aluminiumdruckguß mit im Stillstand verstellbaren Profilschaufeln. Alle Laufräder sind präzise dynamisch ausgewuchtet. Ausführungen mit Durchmesser < 1120 sind einbrennlackiert – Ausführungen mit Durchmesser ab 1120 werden serienmäßig feuerverzinkt geliefert.

MOTOR. Drei Phasen, 220/380 Volt, 50 Hz, Bauart B3. Andere Spannungen und Frequenzen sowie Sonderausführungen auf Anfrage.

LUFTRICHTUNG. Ohne Angabe wird serienmäßig geliefert: Über Motor saugend = "A"; Ausführung über Motor drückend = "B" muß spezifiziert werden.

IMPIEGO. Sono particolarmente adatti per essere impiegati su canalizzazioni per impianti industriali di essiccazione, condizionamento, aspirazione ed emissione d'aria (polverosa, umida o con fumi) ed altre applicazioni in genere dove necessita il trasporto di grandi volumi d'aria con basse e medie pressioni. Trovano il loro utilizzo nelle fonderie, cementerie, falegnamerie, essiccatoi, industrie chimiche, marmistiche ecc. Temperatura d'esercizio - 20 °C + 40 °C.

DESCRIZIONE COSTRUTTIVA. Accoppiamento diretto. La cassa convogliatrice viene costruita in robusta lamiera di acciaio Fe 360 B con doppia flangia a norme DIN 24154 e con portello d'ispezione. La girante pressofusa in lega di alluminio, con pale a profilo alare orientabili da fermo, è accuratamente equilibrata dinamicamente. La verniciatura dei particolari in lamiera viene effettuata mediante immersione in bagno elettrolitico e successiva cottura in forno (+ 180 °C). Per grandezze ≥ 1120 i ventilatori sono zincati a caldo di serie.

MOTORE. Il motore è trifase, 220/380V, 50 Hz, forma B3; (altre frequenze, tensioni, costruzioni a doppia velocità o antideflangente verranno fornite su richiesta).

FLUSSO D'ARIA. Nella costruzione di serie è previsto il flusso d'aria dal motore alla girante (flusso "A"). Su richiesta è previsto anche il flusso opposto (flusso "B").

USE. These fans are particularly suitable for the removal of stale air, for ventilation, drying and for all those applications which entail moving large volumes of air at low and medium pressures.

WORKING TEMPERATURE. - 20 °C + 40 °C.

CONSTRUCTION. Axial-flow fan, direct drive. The housing is made of welded sheet steel, the impeller is made of die-cast aluminium and has adjustable blades. Casing with double flange.

For the size ≥ 1120 the fans are standard hot galvanized.

MOTOR. The motor is three-phase, 220/380 V, 50 Hz, B3; (other frequencies, tensions on demand).

DIRECTION OF THE AIR. Normally supplied with the air flowing from the motor to the impeller (A), with special orders the fans can be supplied with the direction from the impeller to the motor (B).

UTILISATION. Pour séchage, conditionnement, aspiration, c'est-à-dire là où il faut transporter de grands volumes d'air poussiéreux, humide ou fumées. Ils trouvent donc un large débouché dans des fonderies, cimenteries, menuiseries et dans l'industrie chimique. En général ils sont utilisés pour le transport de grands volumes d'air avec basse et moyenne pression.

TEMPÉRATURE D'EXERCISE. - 20 °C + 40 °C.

CONSTRUCTION. Accouplement direct. L'enveloppe est en tôle d'acier, avec deux brides selon DIN 24154. Elle est munie d'une porte de visite. La roue est soigneusement équilibrée dynamiquement. Elle est à haut rendement et avec un niveau sonore réduit, en aluminium coulée sous pression, avec pales profilées, qui peuvent être orientées lorsque l'installation est arrêtée. Toutes les pièces en acier sont peintes par électrophorèse.

Pour les diamètres ≥ 1120 les ventilateurs sont galvanisés à chaud en standard.

MOTEUR. Le moteur est triphasé, 220/380 Volt, 50 Hz, forme B3; (autres fréquences, tensions, double vitesse sont livrés sur demande).

FLUX DE L'AIR. Normalement nous fournissons les ventilateurs avec le flux d'air qui va du moteur à la roue (flux "A"). Sur demande l'on peut fournir le sens inverse (flux "B").

ANWENDUNG. Diese Ventilatoren eignen sich insbesondere für Trocknung, Belüftung und Absaugung, d.h. überall dort, wo große Luftmengen bei niedrigen und mittleren Drücken befördert werden sollen.

BETRIEBSTEMPERATUR. 253 K bis 313 K (-20°C - +40°C).

BAUFORM. Direktantrieb, Rohrmodell - Gehäuse aus Stahl mit druck- und saugseitigem Flansch nach DIN 24154 sowie Wartungsklappe. Laufrad aus ex-geschütztem Aluminiumdruckguß mit im Stillstand verstellbaren Profilschaufeln. Alle Laufräder sind präzise dynamisch ausgewuchtet.

Ausführungen mit Durchmesser < 1120 sind einbrennlackiert – Ausführungen mit Durchmesser ab 1120 werden serienmäßig feuerverzinkt geliefert.

MOTOR. Drei Phasen, 220/380 Volt, 50 Hz, Bauart B3. Andere Spannungen und Frequenzen sowie Sonderausführungen auf Anfrage.

LUFTRICHTUNG. Ohne Angabe wird serienmäßig geliefert: Über Motor saugend = "A"; Ausführung über Motor drückend = "B" muß spezifiziert werden.
